

Eitrandi Lipid nanobitlarnir ferðast allastaðir

Eitrandi Lipid nanobitlarnir, sum nýttir verða í mRNA íleguviðgerðini, ferðast allastaðir, so sum yvirlitið niðanfyri ber boð um, og óhefta vísindin hefur ávarað um! Júst hetta verður mettt so ræðandi skilaleyst, tá hugsað verður um hvat endamálið er, í mun til stóra vandan, og sett í ljósinum av, hvussu einfalt sama endamál kundi verið rokkið, við teimum ”amboðum” vit hava til taks, sum eru meinleys, uttan hjárin!

Kanningin hyggur einans upp til 48 tímar, tó tøluni sýnast at vera vaksandi í hesum tíðarskeiði. Tískil er stórus vandi fyri, at larmandi álvarsemið verður fjalt fyri okkum, sum øll Covid-19 kreppan hefur verið litað av!

Tøluni fyri ”Ovaries (females)”, eru kend frá øðrum Pfizer kanningum, sambært Dr. James Thorp. Hetta verður mettt at viðvirka til fallandi burðartalið í øllum hópkoppsettum londum.

Dr. John Campbell - Nanobitlarnir ferðast allar staðir

Babies Dying In Scotland: Govt Issues Investigation Into Rising Infant Mortality Rate

Written by Kashish Sharma | Updated : October 4, 2022 10:49 AM IST

The Scottish government has issued an investigation into the suddenly rising infant mortality rate in the country. There have been two spikes over a period of six months. Earlier the figures had shown that the death rate for babies under one year of age was at its highest in 10 years. The increase was high enough to initiate an investigation.

Report reveals Pfizer shot caused avalanche of miscarriages, stillborn babies

Among the first reports handed over by Pfizer was a 'Cumulative Analysis of Post-authorization Adverse Event Reports' describing events reported to Pfizer up until February 2021.

Pfizer's report states that there were 23 spontaneous abortions (miscarriages), two premature births with neonatal death, two spontaneous abortions with intrauterine death, one spontaneous abortion with neonatal death, and one pregnancy with "normal outcome." That means that of 32 pregnancies with known outcome, 28 resulted in fetal death.
