**Over the past few months, I have received thousands of requests for help with Cancer, from people who have been betrayed, mistreated or abandoned by their doctors.**

**Due to this unprecedented demand for help, and the failure of medicine and especially Oncology, as of August 1, 2024, I will begin Cancer Consultations.**

**Details of the Cancer Consultations I will provide are as follows:**

### **\$350USD - Initial comprehensive consultation**

- Full review of medical history and cancer diagnosis
- Answer questions about cancer diagnosis
- Coaching on Alternative Cancer Treatments based on newest cutting edge research
- 30 minute phone or zoom session
- a follow-up session within 3 months is included

### **\$250USD - Follow-up consultation**

- if you've had an initial consultation with me already
- re-assessment of medical history and cancer diagnosis
- Additional Alternative Cancer Treatment approaches as needed
- 30 minute phone or zoom session

**Consultations can also be booked for:**

- COVID-19 Vaccine Injuries
- Long COVID / Shedding Injuries

**Please email me at [makisw79@yahoo.com](mailto:makisw79@yahoo.com) for details on consent form, payment details and to book your consult.**

**Payments will be accepted via e-transfer, Paypal, bank transfer, or check / money order.**

**My Take:**

**I have done my best to answer Cancer related questions over the past 2 years but especially in the past 6 months, I have been swamped with requests to the point where it has become impossible to answer emails.**

**Many of you know I am a big supporter of repurposed drugs like Ivermectin, Mebendazole (Fenbendazole), CBD. These are very rare, in that they've shown, in pre-clinical research, an ability to shrink some of the most aggressive cancer tumors and reverse Stage 4 Cancer, sometimes completely.**

**But they've been abandoned by big pharma, which won't do human clinical trials, as there is no money in them.**

**I'm also a big fan of bioactive compounds, that can be taken in various forms:**

## **TURBO CANCER TREATMENT:**

**Repurposed Drugs – Ivermectin, Fenbendazole, Mebendazole**

**Bioactive compounds (supplements) - IP6, CBD (Cannabidiol), Quercetin, Olive Leaf (Oleuropein), Bromelain, Green Tea Extract (EGCG), Curcumin, Resveratrol, Berberine, Black Seed Oil (Thymoquinone)**

**Bioactive compounds (mushrooms) – Turkey Tail, CHAGA, Reishi, Shiitake, Maitake, Lion's Mane, Cordyceps**

**Bioactive compounds (foods) – garlic, ginger, apricot seeds, soursop fruit, noni fruit, green barley grass, pomegranate, Oregano oil, (fermented foods – kimchi, sauerkraut, miso, noni)**

**Immune Support – Vitamin D/K2, Melatonin, Selenium**

**Ketogenic Diet**

**3-5 day FASTING**

**Oncologists are not allowed to suggest ANY of these, let alone the optimal combination for a particular cancer type, possible protocols, etc.**

**Oncologists are only allowed to give Cancer Treatments approved by big pharma, that are highly profitable.**

**To summarize:**

- **Only two Oncologists in the world have recognized the unprecedented phenomenon of COVID-19 Vaccine Induced Turbo Cancer, myself and UK Oncologist Professor Angus Dalgleish**
- **I am the only Oncologist in the world to have published (and passed peer review) one potential mechanism for Turbo Cancer - IgG4 antibody shift.**
- **Vast majority of Oncologists pushed COVID-19 Vaccines on their cancer patients, causing progression of cancer or recurrence of cancer. None have been held accountable for harming so many of their patients.**
- **Almost all Oncologists continue to push toxic COVID-19 mRNA Vaccines on their cancer patients.**
- **Turbo Cancers after COVID-19 Vaccination usually don't respond to conventional chemotherapy, radiation therapy or immunotherapy and Oncologists often have nothing else to offer their cancer patients.**
- **I have recently submitted a research paper that, for the first time, proposes a new approach to Cancer Treatment involving High dose Ivermectin, Mebendazole (Fenbendazole) and other compounds/supplements.**

**I will try to process all requests as expeditiously as possible, especially the most urgent ones.**

**Thank you for your ongoing support and happy World Ivermectin Day 2024!**
