

Her er ein mynd av hvat Heilsuverkið framhaldandi, á 4. ári, bjóðar føroyingum, - og politiska skipanin løyvir hesum!

Eru vit ikki har nú, at talan er um eitt lögreglumál?

mRNA Injury Stories - Australia - 25 year old suffers stillbirth at 34 weeks, collapses at home a week later, found to have brain tumors and is declared brain dead hours within Turbo Cancer diagnosis

Australia is one of the most COVID-19 Vaccinated countries in the world.

Young vaccinated Australians are dropping dead by the thousands.

Australia has over 50,000 excess deaths since COVID-19 Vaccine rollout.

Many of these news stories don't make sense until you read them in the context of COVID-19 Vaccine Injury.

1.A young 25 year old Australian woman, almost certainly COVID-19 mRNA Vaccinated (Australians were extremely compliant and women are even more likely to be vaccinated and compliant with government orders)

2.Her unborn baby dies at 34 weeks - this is never explained but extremely common with COVID-19 mRNA Vaccinated women (stillbirths are up 55% in Alberta for example)

3.She is diagnosed with multiple brain tumors at 25 years old - COVID-19 mRNA Vaccines cause cancer (Turbo Cancer) and Brain cancers are the 2nd most common Turbo Cancer.

4.She dies within hours of diagnosis as she's declared brain dead and her life support is turned off.

Note that there is no investigation planned. No investigation of the stillbirth, no investigation of the Turbo Brain Cancer of a healthy 25 year old woman.

This is the new normal in highly COVID-19 Vaccinated countries. We are supposed to accept these deaths as "routine".

June 2024 Australian Senate Hearing on Excess Deaths: Dr Jeyanthi Kunadhasan shares how Pfizer manipulated trial results by hiding deaths in the vaccinated arm.
