

Childhood Vaccine Injury - 5 month old Charlie James Sears died in his sleep weeks after 4 months vaccinations

Healthy Infant Dies In Sleep After Vaccines Yet His Death Is Ruled “SIDS”

This [video shows us a bright, bubbly, healthy five month old little boy named Charlie](#) along with his mom, [Jessica Waters](#), just days before he passed away [you must be a member of the [Stop Mandatory Vaccination Facebook group](#) to see the video]. Charlie had his newborn vaccines, received vaccinations again at two months old, and another round of injections at four months. Unexpectedly, he died within weeks of his last vaccines. Jessica is a first-time mom who is heartbroken and mourning her baby; the shock and pain she felt when she lost her infant to vaccines is immeasurable and unimaginable. Jessica’s story is one of the [many](#) heart-aching [stories](#) we have featured from parents who have deeply suffered from **losing their child after vaccination**.

Coincidence, again? When does a coincidence become recognized as an [obvious](#) pattern?

A Few Days Before He Died

Jessica: I lost my son, Charlie, January 25th, 2018 and they said it was because of Sudden Infant Death

Syndrome (SIDS). I haven’t done a lot of research, but I have seen [SIDS is linked to vaccines](#). My son was PERFECTLY healthy. He was just fine and then boom, he was gone. He was two days shy of 5 months old when he died and had just received some of his vaccines, but not all of them because I didn’t allow that. I was doing my research, but that didn’t go far because I didn’t fully understand everything I read. He didn’t have any problems **at all** at the time which is why it’s
