Good morning from Omaha, Nebraska. I was referred to you by a man named [REDACTED]. Currently my mother is undergoing Chemo as a last ditch effort in cancer treatment. They are honestly just trying to keep the cancer from spreading.

Attached is her consent. We would like to schedule a time to meet between Dec 5th-10th where I can be with her to discuss alternative treatments. I have her medical records I can forward to you if you would like.

I appreciate your time and attention. The payment has already been sent from [REDACTED]

Respectfully,

- Originally diagnosed in 2020, post chemorad, was in remission 18 months but suffered recurrence.
- Tried Keytruda but it didn't work
- In Nov.2024 had toxicity post 1st cycle of carboplatin & pemetrexed (Alimta)
- Daughter reached out to me!

TREATMENT:

- Ivermectin 1mg/kg/day
- Fenbendazole 888mg/day
- Melatonin 300mg/day
- CBD Oil 50mg/day

RESULTS:

[REDACTED] and William,

I am writing to give you an update on my mom who has been on the protocol for a month. She recently had her last scan and the plan from the oncologist was to then put her on hospice.

After a month of treatment, the one spot in her shoulder which was very large is not lit up at all for cancer. The other two spots are still there but have not grown.

He told her that they would not put her on hospice but they will rescan in 3 months.

The interesting part is, he never asked her what she was taking. Just told her to keep doing what she is doing.

Thank you both for your hand in this.

“The plan from the oncologist was to then put her on hospice”

“After a month of treatment, the one spot in her shoulder which was very large is not lit up at all for cancer. The other two spots are still there but have not grown”

“He told her that they would not put her on hospice but they will rescan in 3 months”

“He never asked her what she was taking. Just told her to keep doing what she is doing”

Oncologists who don't care to find out what saved their patient from HOSPICE.

That's the state of Oncology in the United States in 2025.
