Hello Dr. Makis,

I just saw your interview on brighteon. Thank you for sharing the information you did. You inspired me to share my story. I contracted lyme after finding three ticks on my body in May of 2021. I didn't have insurance, and knew enough about lyme to know that most western doctors wouldn't test for it or even talk about it. I didn't have money to find a doctor either. So I treated myself with raw garlic, wormwood, clove, and black walnut. After a few weeks I felt a little better, but I wasn't cured. By October of 2022 I was losing feeling in all four limbs, up to my elbows and knees within just a few hours of sleep. I was waking up every two hours with numb limbs. A friend who was also a TCM practitioner told me about ivermectin in November of 2022. I went to tractor supply. Within 7 days, the numbness was down to only my fingers. Within 3 weeks it was almost completely gone. I also had lost 30 pounds and was down to 105 pounds (I'm 5'6"), had such bad joint pain that I could hardly move, had torn a miniscus (which I healed with comfrey poultices), and broken a foot (also healed in 3 weeks with comfrey), and was extremely fatigued. After 3 months of ivermectin, I felt better than I had in years. I know that it saved my life. I've studied natural therapeutics, herbalism, ayurveda, for many years just as a hobby, and I was well aware of the problems with parasites in the body. But I had never heard of ivermectin until my friend told me. (I spent most of 2021 and 2022 living in a camper van in the forest and was not following the news like I do today. I was trying to escape the scandemic, so I had not heard about the controversy of ivermectin during that time. I just instinctively knew that being in nature with fresh air and sunshine was the best way to survive it!) But I'm so grateful for my friend who told me about ivermectin, and for people like you who continue to spread the message.

My Take...

This is now my 2nd powerful testimonial about Ivermectin treating Lyme Disease.

Joint pain and neuropathy are serious and debilitating symptoms of Chronic Lyme.

And fatigue is the most common symptom.

All gone with Ivermectin.

LYME DISEASE SYMPTOMS

EARLY LYME* -vs- **CHRONIC LYME****

Fatigue **76%**

Headache **70%**

Rash **<70%**

Fever **60%**

Sweats **60%**

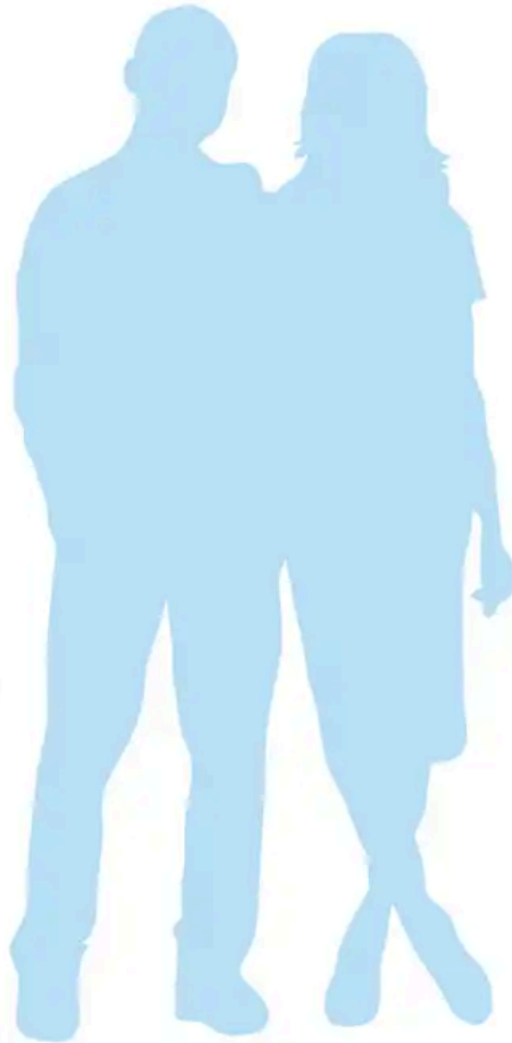

Chills **60%**

Muscle Pain **54%**

Joint Pain **48%**

Neck Pain **46%**

Sleep Issues **41%**

Fatigue **79%**

Joint Pain **70%**

Muscle Pain **69%**

Other Pain **66%**

Sleep Issues **66%**

Cognitive **66%**

Neuropathy **61%**

Depression **62%**

Heart Related **31%**

Headaches **50%**

.....
*(Aucott 2013) ** (Johnson 2014. Moderate to very severe symptoms)
Estimates of rash rates range from 25-80% <http://tinyurl.com/kfvu8yt>
